•	Nature and Extent of involvement of Faculty and students in academic affairs/improvements
	A feedback system is been prepared by respective departments to document the Students' input about the University and more specifically about the Academic and Extracurricular activities. These feedbacks are taken usually at the end of each semester. The reports of the analysis of the feedback

	are sent to the concerned committee for screening and finding the conclusions. The concerned in consultation with the Vice Chancellor/Registrar takes appropriate measures to address the weaknesses. Besides this, the suggestion box for the students has been fixed at the University office. The University makes periodic review of the suggestions/complaints received.

20	<p>Best Practices adopted, if any</p> <p>JSS SCIENCE AND TECHNOLOGY UNIVERSITY was established under the Act No. 43 of 2013 during the year 2016. Since its inception, the University is adopting the following best practices to impart quality technical, engineering, science and humanities and social sciences education along with focused research.</p> <p><b>1. Restructured Engineering Curriculum at JSS S&amp;T U</b></p> <p>The university has taken an initiative to reduce the credits of UG Programmes keeping in mind the necessity of training the future engineers with high quality skills and practical exposure. Most of the courses in the curriculum are designed to have a lab course or a course oriented towards industry. The University has conducted series of interactive sessions with the members of the faculty to evolve an acceptable restructured engineering curriculum based on the guidelines provided by AICTE's model curriculum. Accordingly, the University has developed the model curriculum with 175 credit points for UG Programmes and 88 credits for Postgraduate Programmes.</p>	

A provision has also been made for the students to register for a two credit online courses of their choice under MOOCS or any other recognized online web-based courses. The curriculum also has made provision for two credit foreign language (offered languages, French, Germany and Japanese) and students can take anyone of these courses when it is offered. This restructured curriculum has taken into cognizance the need for laboratory exposure, hands-on experience and practical knowledge to be imparted to the students. Most of the courses have introduced this component in the syllabi to facilitate students to understand and appreciate the practical exposure and analytical skills.

Apart from this a provision has also been made in the restructured curriculum of the University to offer more number of elective courses suggested and offered by the industry for those students who are opting such courses from third semester onwards. This particular concept has attracted good quality students in all the disciplines of engineering to get the job in the industry and they will be industry ready by the time they complete their degree.

JSS Science and Technology University is one of the premier universities identified by MHRD, Govt. of India to participate in GIAN programme. From past two years, the University has conducted 34 such GIAN courses, higher number of GIAN courses in the selected engineering colleges category at National level. There is a provision of credit transfer for those students who register for GIAN programmes of two credits. If a student successfully completes two such GIAN courses, he will be allowed to get the exemption of one elective course by transferring four credits of two GIAN courses. This has become very attractive for the students particularly in circuit branches.

## **2. Encouraging girl students to opt for manufacturing industries**

This concept is a unique concept introduced by Mercedes Benz, R&D Centre, Bengaluru during the year 2017-18. The company is encouraging girl students to take up Mechanical and Industrial Production & Engineering branches and to get employed in manufacturing industries. Based on the quality education being imparted at JSS Science and Technology University under OBE, the University has been selected by Mercedes Benz for this particular programme. The company offers ` 1.00 lakh fellowships per annum per student continuously from second year onwards till the completion of the degree. The selection process is rigorous and the candidates will be based on written test and interview and merit. The company offers 10 fellowships per year and the students are opting for this fellowship continuously in the second year. This has made particularly the maximum number of girl students to opt for Mechanical and Industrial Production & Engineering Programmes. Ten fellowships were offered during 2017-18 while four have been offered during the academic year 2018-19.

The University also has made a provision of Industry-Institute interaction programme which has been revived to invite top brasses of industry for interactive sessions regularly with the Members of the Faculty to have an idea of types of courses and the content of the courses to be introduced in the curriculum structure. This also has facilitated the University as well as the industry to offer more internships for the selected students from second year onwards to groom them to be industry ready by the time they complete the degree. This reduces or almost prevents the efforts of the industry to train students after they are hired. This programme is also very attractive and a greater number of students are availing this facility as an outcome of industry-institute interaction programme.

JSS Science and Technology University is promoting the needy students' financial requirements through SJCE Alumni Association called Alumni scholarship. Annually five students will be identified and given the scholarship regularly from past six years. There is a provision made for the youngsters to be motivated through a competition called Alumni Project Competition.

## **3. Smart and Eco-friendly campus**

JSS Technical Institutions' Campus on which the University is selected has been declared as eco-friendly campus by making it smoke and plastic free campus and effective solid waste management system. The University is putting its effort to make the campus smart campus by providing solar panels, solar lighting system for the entire campus including the buildings, agricultural residue management system through vermicomposting as well as a mini biogas production for small scale cooking purposes in the hostels.

The University is shortly implementing the most ultramodern modular advanced waste water treatment facility to recover the treated waste water for the use purpose. A blue print is ready to implement the rain water harvesting systems on the campus for water collection and use during summer seasons for gardening and other non-domestic purposes. The greenery on the campus is also getting expanded covering almost 30% of the area with attractive horticultural and ornamental plants.

From the day one of its inception, JSS Science and Technology University is emphasizing on less paper or paper-less office to reduce the burden of wastage on the campus as well as in the administration. To promote this, the University has acquired the most modern and the customized ERP solution with various modules starting from student admission, academics, evaluation, OBE compatible, HR management and Finance. Since this ERP is online and accessible to all employees as well as the students, it is more transparent, enables quick decision making and providing information to the stakeholders across the globe without any delay. Students can access very easily the necessary documents and other information along with the payment of fee online through a payment-gateway. Due to all these things, the time, the effort and the materials are completely either prevented or reduced to the maximum extent. Due to all the above efforts, the entire campus is greener, looks beautiful and pollution free campus providing ideal environs for students and the employees to work with.

#### AUDIT REPORT

The Financial Officer,  
Science & Technology University,  
Mysuru.

##### Opinion:

We have audited the financial statements of **Science & Technology University, Mysuru. A private university established by JSS Science and Technology UNIVERSITY Act 2013, (A govt of Karnataka Act)** which comprise the Balance Sheet as at 31st March, 2020 and the Income and Expenditure Account for the year ended on that date, and a summary of significant accounting policies and other explanatory information annexed thereto.

In our opinion and to the best of our information, and according to the explanations given to us, the aforesaid financial statements read with the schedules and notes thereto, are prepared, in all material respects, in accordance with the Karnataka Societies Registration Act, 1960 and **JSS Science and Technology University Act 2013**; give a true and fair view of the State of Affairs of the University as at 31st March 2020 and its Excess of Income over Expenditure for the year ended on that date.

##### Basis for Opinion:

We conducted our audit in accordance with Standards on Auditing (SAs) issued by the Institute of Chartered Accountants of India. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Association in accordance with the Code of Ethics issued by ICAI and we have fulfilled our other ethical responsibilities in accordance with the code of ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the financial statements.

##### Responsibilities of Management and Those Charged with Governance for the Financial Statements:

The Management of **Science & Technology University, Mysuru** is responsible for the preparation of these financial statements that give a true and fair view in accordance with requirements of Karnataka Societies Registration Act, 1960, JSS Science and Technology University Act 2013, and generally accepted accounting principles and to provide for such internal controls as the Executive Committee determines it necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Executive Committee is responsible for assessing the Association's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Executive Committee either intends to liquidate the Association or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Association's financial reporting process.

#### **Auditor's Responsibilities for the Audit of the Financial Statements:**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Standards on Auditing (SAs) issued by the Institute of Chartered Accountants of India will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on effectiveness of the Association's internal controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Executive Committee.
- Conclude on the appropriateness of the Executive Committee's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Association's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Association to cease to continue as a going concern.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.
