## **About JSS Science and Technology University**

JSS Science and Technology University was started under the Private Management of J.S.S. Mahavidyapeetha, Mysuru, during the year 2016. The Government of Karnataka has accorded approval to establish and commence a Private University in the name and style “J.S.S Science and Technology University” at Sri Jayachamarajendra Engineering College campus, Mysuru (Notification No. ED 84 URC 2014).

JSS Science and Technology University is one of the recent additions to the institutions administered by JSS Mahavidyapeetha, and is the second University being established besides a Medical University at Mysuru. India’s higher education system is on the verge of major reforms and JSS Science and Technology University has been established to create a bright future and a desired learner centric eco-system and transform into a futuristic global University. The Availability of skilled human resources and trained technical manpower in engineering and technology is a major reason for growing investments in the state. In this context the higher education system has a key role and more particularly JSS S&T U with an objective of transforming the students at all levels of higher education including research and innovation with measures to improve the quality of workforce.

## **Vision of JSS Science and Technology University**

- Advancing JSS S&T University as a leader in education, research and technology on the international arena.
- To provide the students a universal platform to launch their careers, vesting the industry and research community with skilled and professional workforce.
- Accomplishing JSS S&T University as an epicenter for innovation, center of excellence for research with state of the art lab facilities.
- Fostering an erudite, professional forum for researchers and industrialists to coexist and to work cohesively for the growth and development of science and technology for betterment of society.

## **Mission of JSS Science and Technology University**

- Education, research and social outreach are the core doctrines of JSS S&T University that are responsible for the accomplishment of in-depth knowledge base, professional skill and innovative technologies required to improve the socio economic conditions of the country.
- Our mission is to develop JSS S&T University as a global destination for cohesive learning of engineering, science and management which are strongly supported with interdisciplinary research and academia.
- JSS S&T University is committed to provide world class amenities, infrastructural and technical support to the students, staff, researchers and industrial partners to promote and protect innovations and technologies through patents and to enrich entrepreneurial endeavors.
- JSS S&T University's core mission is to create a knowledge led economy through appropriate technologies, and to resolve societal problems by educational empowerment and ethics for better living.

## **Vision of Sri Jayachamarajendra College of Engineering**

- “Be an international leader in engineering education, research and application of knowledge to benefit society globally”.

## **Mission of Sri Jayachamarajendra College of Engineering**

- “To synergistically develop high-quality manpower and continue to stay competitive in tomorrow’s world”.
- “To foster and maintain mutually beneficial partnerships with our alumni, industry, state and central governments through public services assistance and collaborative research”.
- “To create empowered individuals with a sense of identity”.

## **Vision of Department of Information Science and Engineering**

- “To be an outstanding education center in Information Science and Engineering through excellence in teaching and research.”

## **Mission of Department of Information Science and Engineering**

- To empower the graduates with domain-specific knowledge, skill and creative thinking.
- To create wide-angle exposure to the stakeholder on thrust areas.
- To prepare graduates with research and entrepreneurship attitude having high moral and ethical values.

## **ABOUT THE DEPARTMENT OF INFORMATION SCIENCE & ENGINEERING**

- The Department of Information Science & Engineering was established in the year 2000.
- The department offers two undergraduate program B.E in Information Science and Engineering started in the year 2000, B.E in Computer Science & Business Systems (CSBS) started in the year 2019 and two postgraduate programs M.Tech in Software Engineering started in the year 1995 and M.Tech in Data Sciences started in the year 2017.
- The students of the department have a good placement record of more than 90%.
- The department has highly qualified faculty members who have rich experience in the areas of Machine Learning, Deep Learning, Artificial Intelligence, Pattern Recognition, Natural language processing, Medical Image Analysis, Computational Linguistics, Biomedical Informatics, Computer Networks, Wireless Networks, IoT, Speech Signal Processing.
- Faculty have international collaboration with various reputed International Universities like Harvard University, USA, Nanyang Technological University, Singapore, Saint Petersburg State Electro Technical University "LETI" (ETU), Russia, University of Mannheim, Germany, University of Genova, Italy, and many more.
- Faculty publish their research findings in the reputed Journals and Conference proceedings with good citation index.
- The department regularly conducts workshops, seminars, symposiums, and faculty development programmes to keep updated with emerging technologies.
- The department is housed with high end computing facilities like GPU machines such as ParamShavak, High End Internet Facilities, wifi facilities, access to reputed journals like IEEE, Springer, Elsevier and many more.
- Alumni of the department pursue their higher studies within the country as well as abroad and some of the alumni are successful entrepreneurs.

### **Programmes offered (UG & PG)**

#### **Department offers two Undergraduate programs**

- B.E in Information Science and Engineering (ISE) with an intake of 90
- B.E in Computer Science and Business Systems (CSBS) with an intake of 60

#### **Department offers two Postgraduate programs**

- M.Tech in Software Engineering (SE) with an intake of 18
- M.Tech in Data Sciences (DS) with an intake of 20
- M.Sc in Computer Science (Data Science) with an intake of 30

## Department Faculty Details

Sl. No.	Name	Designation	Qualification
1	Dr. B S Harish	Professor	B.E., M.Tech., Ph.D
2	Dr. D S Vinod	Professor	B.E., M.Tech., Ph.D
3	Dr. Mahanand B S	HOD, Professor	B.E., M.Tech., Ph.D
4	Dr. S P Shiva Prakash	Professor	BE, M.Tech, Ph.D.
5	Dr.Umesh K K	Associate Professor	BE, M.Tech, Ph.D.
6	Dr. R J Prathibha	Associate Professor	B.E., M.Tech, Ph.D
7	Dr. Vanishri Arun	Associate Professor	BE, M.Tech, Ph.D.
8	Dr. H Y Vani	Associate Professor	B.E., M.Tech., Ph.D.
9	Dr. Manju N	Associate Professor	BE, M.Tech, Ph.D.
10	Dr. C K Roopa	Associate Professor	BE, M.Tech, Ph.D.
11	Dr. M S Maheshan	Associate Professor	BE, M.Tech, Ph.D.
12	Ms. Shyla Raj	Assistant Professor	BE, M.Tech, (Ph.D.)
13	Mr. Praveen Murthy K S	Assistant Professor	BE, M.Tech, (Ph.D.)
14	Ms. Tejaswini M	Assistant Professor	BE, M.Tech , (Ph.D.)
15	Ms. Sindhu G	Assistant Professor	BE, M.Tech
16	Ms. Malapriya S	Assistant Professor	BE, M.Tech , (Ph.D.)
17	Ms. Sindhu A S	Assistant Professor	BE, M.Tech, (Ph.D.)
18	Ms. Shruthi N	Assistant Professor	BE, M.Tech, (Ph.D.)
19	Ms. T S Kaveri	Assistant Professor	BE, M.Tech
20	Ms. Lavanya M S	Assistant Professor	BE, M.Tech, (Ph.D.)
21	Mr. Nagarjun A	Assistant Professor	BE, M.Tech

## Laboratory facilities

Department has well equipped laboratories which help in attaining program outcomes. Students develop a wide range of applications to enhance their learning abilities in the laboratory. Details of laboratory facilities are provided in the table below:

Sl. No.	Name of the Laboratory	Equipment Name	Equipment details
1	Software Laboratory – 1	DELL  Quantity 30 Nos.	<ul style="list-style-type: none"> <li>• i7 8th Generation Processor,</li> <li>• Q 370Processor</li> <li>• 810G Mil Grad Chaises</li> <li>• 256 GB Solid State Drive (this gives high performance)</li> <li>• 22 inch Full High Definition Monitor with IPS panel,</li> <li>• 5 Year K7 Antivirus: top end protection with internet security</li> <li>• 8GB single chip RAM</li> <li>• Multimedia Keyboard, Mouse.</li> <li>• System box with build in Graphics card (Pre-fitted) : UHD 630</li> <li>• Built in Operating System: Windows 10.</li> <li>• Built in speaker.</li> </ul>
		DELL Vostro 3900 Series,  Quantity 5 Nos.	<ul style="list-style-type: none"> <li>• Intel core I5 4460 processor,3.2GHz</li> <li>• windows 8.1Professional OS,</li> <li>• 4GB DDRRAM,</li> <li>• 1TB SATA HDD,</li> <li>• 19.5 Wide TFT LED Wider monitor screen</li> </ul>
		HCL  Quantity 6 Nos.	<ul style="list-style-type: none"> <li>• 2 GB RAM DDR2, INTEL Core 2 DUO Processor</li> <li>• DVD writer</li> <li>• 160 GB HARD DISK,</li> <li>• 17" LCD Monitor</li> </ul>

2	Software Laboratory – 2	DELL	<ul style="list-style-type: none"> <li>• i7 8th Generation Processor,</li> <li>• Q 370Processor</li> <li>• 810G Mil Grad Chaises</li> <li>• 256 GB Solid State Drive (this gives high performance)</li> <li>• 22 inch Full High Definition Monitor with IPS panel,</li> <li>• 5 Year K7 Antivirus : top end protection with internet security</li> <li>• 8GB single chip RAM</li> <li>• Multimedia Keyboard, Mouse.</li> <li>• System box with build in Graphics card (Pre-fitted) : UHD630</li> <li>• Built in Operating System : Windows 10</li> <li>• Built in speaker</li> </ul>
		DELL Vostro 3900 Series,	<ul style="list-style-type: none"> <li>• Intel core I5 4460 processor,3.2GHz,</li> <li>• windows 8.1Professional OS,</li> <li>• 4GB DDR RAM,</li> <li>• 1TB SATA HDD,</li> <li>• 19.5 inch TFT LED monitor</li> </ul>
3	PG Lecture hall/ Laboratory	Computing Device	<ul style="list-style-type: none"> <li>• X3100 M4 IBM,</li> <li>• Intel Xeon Quad core 500GB HDD,</li> <li>• 4 GB RAM, 2 GB Graphics card, 21.5 inch full HD Monitor</li> <li>• DVD writer, Keyboard &amp; Mouse.</li> </ul>
		HCL	<ul style="list-style-type: none"> <li>• 2 GB RAM DDR2, Intel core 2 Duo processor</li> <li>• DVD writer, 160 GB hard disk,</li> <li>• 17 inch LCD Monitor</li> </ul>

**Software Laboratory-1**

**Software Laboratory-2**

**PG Lecture Hall**

**PG Laboratory**

**Data Science and Machine Learning Laboratory**

**Computer Vision and Pattern Recognition Laboratory**

**Network Operating Center**

## **Research & Consultancy**

The department has highly qualified faculty members who have rich experience in the areas of Machine Learning, Deep Learning, Artificial Intelligence, Pattern Recognition, Natural language processing, Medical Image Analysis, Computational Linguistics, Biomedical Informatics, Computer Networks, Wireless Networks, IoT, Speech Signal Processing. Faculty have international collaboration with various reputed International Universities like Harvard University, USA, Nanyang Technological University, Singapore, Saint Petersburg State Electro Technical University "LETI" (ETU), Russia, University of Mannheim, Germany, University of Genova, Italy, and many more. Faculty publish their research findings in the reputed Journals and Conference proceedings with good citation index.

The department has well equipped research laboratories to develop research capabilities of the students. The students are allowed to access the devices through centralized computing facilities all through the day. Wi-Fi facility is provided to all the students and laboratories have access to scientific journals like IEEE, Science direct, etc.

## **Employment Opportunities**

Placement office encourages students to gain a great deal of knowledge. In order to offer Placement, the placement officer and the companies involve themselves in a lot of industry institute activities which are as follows:

- Regular Students development programs are offered by domain specific core companies, in means of Technical workshops, seminars and quiz programs.
- Regular Industry visits will be organized.
- Special scholarships will be given out to students who are achievers.
- Encouraging students to participate in Hackathons and Coding contests.
- Coordinate with companies in organizing workshops on latest trends in the industries specific to core sectors.
- Involving companies in syllabus formation and delivery of new courses to students.

The Placement and Training department takes initiatives to provide adequate training for students to enable them to have better employability skills compared to other colleges. During the final year of their program, students work in and for companies as interns. In this way they gain valuable practical experience, while bringing their own added value of knowledge and expertise to the companies they are working for. Majority of these students will be converted to full time employees based on their internship perform

## **Industry-Institute-Interaction**

Interaction between technical institutions and industry is the need of the hour. Industry Institute Interaction will have great bearing on the engineering curriculum, exposure of engineering students to industrial atmosphere. There is a need to create avenues for a close academia and industry interaction through all the phases of technology development, starting from conceptualizing to commercialization. The Industry Institute Interaction Cell is established at JSS Science and Technology University with the following objectives:

- To cultivate the strong links with industry.
- To promote various industrial activities by the faculty members and students
- To have a closer linkage and promote research suited to industry needs, and consultancy
- To provide continuing education to people working in industries so that they can upgrade their technical knowledge, and / or obtain higher degrees
- To catalyze the further growth and development of interaction between the Institute and Industry
- To bring about Memoranda of Understanding and Agreements with various industrial and research organizations

## Board of Studies

Sl. No.	Category	Designation	Name of the Person	
1	The Dean(s) of the Faculties	Ex-Officio Member	Dr. B Manoj Kumar	
	Dean (Science)		Dr P Mallu	
2	Head of the Department	Chairperson		Dr. Mahanand B S
3	All Professors of the Department	Members		Dr. B S Harish
4	Two Senior Associate Professors of the concerned Department by rotation	Members	1	Dr. D S Vinod
			2	Dr. Umesh K. K.
5	One Senior Assistant Professor of the concerned Department by rotation	Member	1	Dr. R J Prathiba
6	One External Subject Expert from any reputed Academic /Research Institution/ Other Universities nominated by the Academic Council	Member	1	Dr.Uttam Kumar Assistant Professor, Infosys Foundation Career Development Chair Professor International Institute of Information Technology Bangalore
7	One External subject expert from any reputed Academic / Research Institutions/other Universities nominated by the Vice Chancellor upon recommendation by the Dean of respective faculty.	Member	1	Dr.Suresha, PhD ( IISC) Professor Department of Studies in Computer Science University of Mysore
8	Two external members from concerned industry/Government Departments/Public Sector undertakings/ allied area relating to placement, nominated by the Academic Council upon recommendation by the Dean of respective faculty.	Members	1	Mahesh S Associate Group manager SLK Software Bangalore
			2	Jyothi Balraj Wipro technologies Electronic city Phase 1 Bangalore 560100
9	One postgraduate meritorious alumnus, to be nominated by the Head of the Department.	Member	1	Rakshith U J Principal Product Manager AI/ML Platforms and Services Walmart labs, Bangalore

10	<p>The Chairperson, Board of Studies, may with the approval of the Vice Chancellor, co-opt as Members:</p> <p>a) One external subject expert from reputed Academic/Research Institution/Other Universities/Industry/Government departments/public sector undertakings, whenever special courses of studies are to be formulated.</p>	Members		<p>Sharath Chandra N Solution Architect – Applications Tata Consultancy Services, Bengaluru</p>
	<p>b) Two other members of faculty of the concerned Department.</p>		1	<p>Dr. S P Shiva Prakash</p>
			2	<p>Dr. Pradeep M</p>

## Programme Overview

M.Sc. in Computer Science (Data Science) is a two-year post-graduate programme dedicated to enlighten students with the designing, implementing, testing, and modifying of the software to make it viable, maintainable and affordable. The programme offers students with a strong base on principles of data science and application domain.

## Programme Educational Objectives

#	Program Educational Objectives:-The Graduates will be able to:
PEO – 1	Critically think and apply the principles of data science to solve real world problems.
PEO – 2	Contribute to research and development in cutting edge technology.

## Programme Outcomes

#	Program Outcomes: -The Graduates will be able to:
PO-1	An ability to independently carry out research/investigation and development work to solve practical problems.
PO-2	An ability to write and present a substantial technical report/document
PO-3	Students should be able to demonstrate a degree of mastery over the area as per the M.Sc. in Computer Science (Data Science) program. The mastery should be at a level higher than the requirements in the appropriate bachelor program.
PO-4	Ability to develop and apply data science principles to solve real world problems.
PO-5	Analyze and apply emerging IT tools to model complex work activities.
PO-6	To excel in IT profession, entrepreneurship and research activities with ethical standards.

## **Quality Policy**

- To deliver excellent academic programs and develop innovative strategies to educate Undergraduate, Postgraduate and Research students.
- To instill quality education to students in terms of academics, research and societal needs.
- To improve the quality of the undergraduate, postgraduate and research programs.
- Improve infrastructure for student laboratories and classes.
- To encourage undergraduate and postgraduate students to begin startups.
- To introduce modern computing and managerial skills in the curriculum.

## M.Sc in Computer Science (Data Science)

### Program Structure 2023-24

#### Scheme of Teaching and Examination for I to IV semester

Semester	Credits
I	24
II	24
III	16
IV	16
<b>TOTAL</b>	<b>80</b>

#### Credit Pattern

Semester	Type of Course	Number	Credits
I	Professional Core	04	16 credits
	Professional Elective – I	01	04 credits
	Professional Core Laboratory	01	02 credits
	Mini Project with Seminar	01	02 credits
	<b>Sub Total = 24 credits</b>		
II	Professional Core	03	12 credits
	Professional Elective - II	01	04 credits
	Open Elective Course	04	04 credits
	Research Methodology and IPR	01	02 credits
	Professional Core Laboratory	01	02 credits
<b>Sub Total = 24 credits</b>			
III	Professional Elective - III	04	04 credits
	Internship/ Industrial Training	01	06 credits
	Project Work Phase- I	01	06 credits
<b>Sub Total = 16 credits</b>			
IV	Professional Elective - IV	01	04 credits
	Project Work- Phase- II	01	12 credits
<b>Sub Total = 16 credits</b>			
<b>TOTAL</b>			<b>80 credits</b>

**COURSE PREREQUISITE:** Fundamentals of Mathematics

**COURSE OBJECTIVES:** To enable discovery of information and knowledge to guide effective decision making and to gain insights from various data sets.

**COURSE OUTCOMES (COs)**

<b>CO#</b>	<b>Course Outcomes</b>	<b>Highest Level of Cognitive Domain</b>
<b>CO1</b>	Explain a flow process to solve data science problems.	L2
<b>CO2</b>	Apply mathematical concepts to classify data science problems into standard topology.	L3
<b>CO3</b>	Incorporate the concepts of probability theory and its applications on real world problems	L3
<b>CO4</b>	Analyze and illustrate statistical techniques.	L3
<b>CO5</b>	Assess the solution approach through visualization and presentation.	L5

**L1 – Remember, L2 – Understand, L3 – Apply, L4 – Analyze, L5 – Evaluate, L6 - Create**

## Course Content / Syllabus:

UNIT No.	Content	Hours
1	<b>Introduction</b> What is Data Science?, Basic Terminology, Why Data Science?, Example – Sigma Technologies, The data science Venn diagram, The math: Example – Spawner-Recruit Models, Computer programming (Preferably Python/R/Matlab/PERL), Some more terminology, Some Data science case studies, Data Models and its types. Types of Data, Flavors of data, Structured versus unstructured data, Quantitative versus qualitative data, The four levels of data, The Five Steps of Data Science.	12
2	<b>Basic Mathematics – Vectors and Matrices</b> Vectors and Linear Combinations, Lengths and Dot Products, Matrices, Solving Linear Equations: Vectors and Linear Equations, The Idea of Elimination, Elimination Using Matrices, Rules for Matrix Operations, Inverse Matrices, Elimination = Factorization: $A = LU$ , Transposes and Permutations, Vector Spaces and Subspaces: Spaces of Vectors, The Nullspace of A: Solving $Ax = 0$ and $Rx = 0$ , The Complete Solution to $Ax = b$ , Independence, Basis and Dimension, Dimensions of the Four Subspaces	12
3	<b>Probability</b> Basic definitions, Probability, Bayesian versus Frequentist, Frequentist approach, Compound events, Conditional probability, The rules of probability, Collectively exhaustive events, Bayesian ideas revisited, Bayes theorem, Random variables.	12
4	<b>Statistics</b> Basic Statistics, What are statistics ?, How do we obtain and sample data?, Obtaining data, Sampling data, How do we measure statistics?, Point estimates, Sampling distributions, Confidence intervals, Hypothesis tests, Conducting a hypothesis test, Type I and type II errors, Hypothesis test for categorical variables.	12
5	<b>Visualization</b> Basic principles, ideas and tools for data visualization, why does communication matter?, Identifying effective and ineffective visualizations, Scatter plots, Line graphs, Bar charts, Histograms, Box plots, When graphs and statistics lie, Correlation versus causation, Simpson's paradox, If correlation doesn't imply causation, then what does?, Verbal communication, The why/how/what strategy of presenting, Data Science ethical issues.	12

	<b>Total</b>	<b>4</b>	<b>4</b>	<b>Minimum Marks</b>	<b>20 marks</b>	<b>25 marks</b>	<b>45 Marks</b>

**COURSE PRE REQUISITES:** Data structures

**COURSE OBJECTIVES:** To provide the theoretical backbone of computer science to analyze time and space complexity theory thereby able to write efficient program. To provide knowledge of various algorithm design strategies.

**COURSE OUTCOMES:** After completing this course, students should be able to:

CO#	Course Outcomes	Highest Level of Cognitive Domain
CO1	Analyze the efficiency of algorithms using time and space complexity theory	L2
CO2	Solve problems using algorithm design methods such as the brute force, greedy method, and dynamic programming	L3
CO3	Solve problems using algorithm design methods such as the backtracking and branch and bound.	L3
CO4	Solve graph and tree problems by applying appropriate algorithmic technique.	L3
CO5	Analyze the computability of certain problem.	L3

L1 – Remember, L2 – Understand, L3 – Apply, L4 – Analyze, L5 – Evaluate, L6 - Create

**Course Content / Syllabus:**

UNIT No.	Content	Hours
UNIT 1	<b>Introduction:</b> Characteristics of Algorithm. Analysis of Algorithm: Asymptotic analysis of Complexity Bounds – Best, Average and Worst-Case behavior; Performance Measurements of Algorithm, Time and Space Trade-Offs, Analysis of Recursive Algorithms through Recurrence Relations: Substitution Method, Recursion Tree Method and Masters’ Theorem. Mathematical analysis of Non- Recursive and recursive Algorithms with Examples Important Problem Types: Sorting and Searching	<b>12</b>
UNIT 2	<b>Fundamental Algorithmic Strategies:</b> Brute-Force, Heuristics, Greedy, Dynamic Programming. Knapsack, Coin change, Huffman code.	<b>12</b>
UNIT 3	<b>Branch and Bound and Backtracking methodologies:</b> Illustrations of these techniques for Problem-Solving, Travelling Salesman Problem, N-Queens, Graph Coloring, knapsack.	<b>12</b>

UNIT 4	<b>Graph and Tree Algorithms:</b> Traversal algorithms: Depth First Search (DFS) and BreadthFirst Search (BFS); Shortest path algorithms, Transitive closure, Minimum Spanning Tree, Topological sorting, Network Flow Algorithm.	<b>12</b>
UNIT 5	<b>Computability of Algorithms:</b> Computability classes – P, NP, NP-complete and NP-hard. Cook's theorem, Standard NP-complete problems and Reduction techniques.	<b>12</b>

**COURSE PREREQUISITE:** Discrete Mathematical Structures

**COURSE OBJECTIVES:** To introduce database management systems, and emphasis on how to organize, maintain, and retrieve information from database.

**COURSE OUTCOMES:** After completing this course, students should be able to:

<b>CO#</b>	<b>Course Outcomes</b>	<b>Highest Level of Cognitive Domain</b>
<b>CO1</b>	Describe different data models in database management systems	L2
<b>CO2</b>	Demonstrate to create a database and formulation of queries using Structured Query Language (SQL)	L3
<b>CO3</b>	Illustrate query optimization and indexing in relational database.	L3
<b>CO4</b>	Discuss the concepts of transactions and concurrency control.	L2
<b>CO5</b>	Explain advanced database systems and database security.	L2

L1 – Remember, L2 – Understand, L3 – Apply, L4 – Analyze, L5 – Evaluate, L6 -Create

**Course Content / Syllabus:**

<b>UNIT No.</b>	<b>Content</b>	<b>Hours</b>
UNIT 1	<b>Introduction:</b> Introduction to Database. Hierarchical, Network and Relational Models. <b>Database system architecture:</b> Data Abstraction, Data Independence, Data Definition Language (DDL), Data Manipulation Language (DML). <b>Data models:</b> Entity-relationship model, network model, relational and object-oriented data models, integrity constraints, data manipulation operations.	<b>12</b>
UNIT 2	<b>Relational query languages:</b> Relational algebra, Tuple and domain relational calculus, SQL3, DDL and DML constructs, Open source and Commercial DBMS - MYSQL, ORACLE, DB2, SQL server. <b>Relational database design:</b> Domain and data dependency, Armstrong's axioms, Functional Dependencies, Normal forms, Dependency preservation, Lossless design.	<b>12</b>

UNIT 3	<b>Query processing and optimization:</b> Evaluation of relational algebra expressions, Query equivalence, Join strategies, Query optimization algorithms. <b>Storage strategies:</b> Indices, B-trees, Hashing.	<b>12</b>
UNIT 4	<b>Transaction processing:</b> Concurrency control, ACID property, Serializability of scheduling, Locking and timestamp-based schedulers, Multi-version and optimistic Concurrency Control schemes, Database recovery.	<b>12</b>
UNIT 5	<b>Database Security:</b> Authentication, Authorization and access control, DAC, MAC and RBAC models, Intrusion detection, SQL injection. <b>Advanced topics:</b> Object oriented and object relational databases, Logical databases, Web databases, Distributed databases, Data warehousing and data mining.	<b>12</b>

**COURSE PREREQUISITE:** Data Structure.

**COURSE OBJECTIVES:** To build data mining applications using statistical analysis techniques.

**COURSE OUTCOMES:** After completing this course, students should be able to:

CO#	Course Outcomes	Highest Level of Cognitive Domain
CO1	Perceive the basic concepts, principles and techniques of data mining	L2
CO2	Analyze association rule mining in various dimensional databases.	L4
CO3	Apply various Classification techniques and different types of classifiers	L3
CO4	Analyze and adapt existing clustering techniques in various applications.	L4
CO5	Illustrate the recent trends and applications of data mining techniques.	L2

L1 – Remember, L2 – Understand, L3 – Apply, L4 – Analyze, L5 – Evaluate, L6 – Create

**Course Content / Syllabus:**

UNIT No.	Content	Hours
<b>1</b>	<b>Introduction to Data Mining:</b> What is Data Mining, Definition, KDD, Challenges, Data Mining Tasks. Data Preprocessing: An Overview, Data Cleaning, Data Integration, Data Reduction, Data Transformation, and Data Discretization and Binarization, Data Transformation; Measures of Similarity and Dissimilarity- Basics..	<b>12</b>
<b>2</b>	<b>Association Rules:</b> Problem Definition, Frequent Item Set Generation, The APRIORI Principle, Support and Confidence Measures. Association Rule Generation: APRIORI Algorithm, The Partition Algorithms, FP-Growth Algorithms, Compact Representation of Frequent Item Sets- Maximal Frequent Item Set, Closed Frequent Item Set. Evaluation of association patterns, Effect of skewed support distribution.	<b>12</b>
<b>3</b>	<b>Classification:</b> Introduction, Classification techniques: Decision Trees Induction : Construction, Methods for Expressing attribute test conditions, Measures for Selecting the Best Split, Algorithm for Decision tree Induction; KNN Classifier, Bayesian Classifiers, Bayesian Belief Networks - Algorithm and Characteristics.	<b>12</b>

<b>4</b>	<b>Clustering:</b> Problem Definition, Clustering Overview, K-means Algorithm, K-means: Additional issues. Hierarchical clustering – Agglomerative and divisive methods, specific techniques, key issues in Hierarchical Clustering, Strengths, and Weakness; DBSCAN- Algorithm, strength, and Weaknesses; Cluster Evaluation.	<b>12</b>
<b>5</b>	<b>Advanced Applications:</b> Mining data streams–Mining Time–series data–Mining sequence patterns in Transactional databases– Mining Object– Spatial– Multimedia–Text and Web data – Spatial Data mining– Multimedia Data mining–Text Mining– Mining the World Wide Web.	<b>12</b>

**COURSE PRE REQUISITES:** Mathematical Concepts like Statistics and Calculus.

**COURSE OBJECTIVES:**

1. To understand the biological neural network and to model equivalent neuron models.
2. To understand the architecture, learning algorithms and issues of various feed forward and feedback neural networks.

**COURSE OUTCOMES:** After completing this course, students should be able to:

CO#	Course Outcomes	Highest Level of Cognitive Domain
CO1	Examine different Neural Network Architectures and Learning Rules.	L2
CO2	Analyze and differentiate Single Layer Perceptron and Multi-layered Perceptron based on their capabilities.	L4
CO3	Apply Back Propagation and solve different Neural Network Problems.	L3
CO4	Apply Self Organizing Maps in solving different pattern classification tasks.	L3
CO5	Differentiate Neural Networks and Deep Learning Algorithms.	L2

L1 – Remember, L2 – Understand, L3 – Apply, L4 – Analyze, L5 – Evaluate, L6 - Create

**Course Content / Syllabus:**

UNIT No.	Content	Hours
UNIT 1	<b>Introduction:</b> A Neural Network, Human Brain, Models of a Neuron, Network Architectures, Knowledge Representation, Artificial Intelligence and Neural Networks	12
UNIT 2	<b>Single Layer Perceptron:</b> Unconstrained optimization, LMS algorithm, learning curves, perceptrons, convergence theorem, limitations of single-layer perceptron <b>Multilayer Perceptron:</b> Back-propagation algorithm, XOR problem, feature detection, accelerated convergence of back-propagation algorithm, limitations	12
UNIT 3	<b>Back Propagation:</b> Back Propagation and Differentiation, Hessian Matrix, Generalization, Cross Validation, Network Pruning Techniques, Virtues, and Limitations of Back Propagation Learning, Accelerated Convergence, Supervised Learning.	12

UNIT 4	<b>Self-Organizing Maps (SOM):</b> Two Basic Feature Mapping Models, Self-Organization Map, SOM Algorithm, Properties of Feature Map, Learning Vector Quantization, Adaptive Pattern Classification.	<b>12</b>
UNIT 5	<b>Applications of Neural Networks:</b> Recent trends in Neural Networks, Applications of Neural Networks, What is Deep Learning, Difference between Neural Networks and Deep Learning. Case Study: Using Feed forward Neural Networks for Handwritten Digit Recognition.	<b>12</b>

**COURSE PREREQUISITE:** Analysis and Design of Algorithms

**COURSE OBJECTIVES:** This course provides an understanding of advanced algorithms, algorithmic paradigms, and data structures used to solve the problems.

**COURSE OUTCOMES (COs)**

<b>CO#</b>	<b>Course Outcomes</b>	<b>Highest Level of Cognitive Domain</b>
<b>CO1</b>	To implement the graph search algorithms.	L4
<b>CO2</b>	To implement the string matching algorithms	L3
<b>CO3</b>	To implement the modular linear equation algorithms	L3

L1 – Remember, L2 – Understand, L3 – Apply, L4 – Analyze, L5 – Evaluate, L6 - Create

**Course Content / Syllabus:**

<b>Week</b>	<b>List of Experiments/ Programs</b>	<b>No. of Hours</b>
1	Sort a given set of elements using the Quicksort method and determine the time required to sort the elements. Repeat the experiment for different values of n, the number of elements in the list to be sorted and plot a graph of the time taken versus n. The elements can be read from a file or can be generated using the random number generator.	2
2	Implement a parallelized Merge Sort algorithm to sort a given set of elements and determine the time required to sort the elements. Repeat the experiment for different values of n, the number of elements in the list to be sorted and plot a graph of the time taken versus n. The elements can be read from a file or can be generated using the random number generator.	2
3	Implement 0/1 Knapsack problem using Dynamic Programming.	2
4	Find a subset of a given set $S = \{s_1, s_2, \dots, s_n\}$ of n positive integers whose sum is equal to a given positive integer d. For example, if $S = \{1, 2, 5, 6, 8\}$ and $d = 9$ there are two solutions $\{1, 2, 6\}$ and $\{1, 8\}$ . A suitable message is to be displayed if the given problem instance doesn't have a solution.	2
5	Implement N Queen's problem using Back Tracking	2
6	Implement any scheme to find the optimal solution for the Traveling Salesperson problem and then solve the same problem instance using any approximation algorithm	2

	and determine the error in the approximation.	
7	a. Print all the nodes reachable from a given starting node in a digraph using BFS method. Check whether a given graph is connected or not using DFS method.	2
8	From a given vertex in a weighted connected graph, find shortest paths to other vertices using Dijkstra's algorithm.	2
9	Implement All-Pairs Shortest Paths Problem using Floyd's algorithm.	2
10	a. Obtain the Topological ordering of vertices in a given digraph. Compute the transitive closure of a given directed graph using Warshall's algorithm	2
11	Find Minimum Cost Spanning Tree of a given undirected graph using Kruskal's algorithm.	2
12	Find Minimum Cost Spanning Tree of a given undirected graph using Prim's algorithm	2
13	Internal Test	2

**COURSE OUTCOMES (COs)**

<b>CO#</b>	<b>Course Outcomes</b>	<b>Highest Level of Cognitive Domain</b>
<b>CO1</b>	Identify and analyze a problem to be solved computationally.	L4
<b>CO2</b>	Design and develop solutions to the problem and analyze results.	L3
<b>CO3</b>	Prepare project reports and presentations.	L6

**L1 – Remember, L2 – Understand, L3 – Apply, L4 – Analyze, L5 – Evaluate, L6 - Create**

This course is introduced to help the students to get a practical exposure of the subjects studied during this semester. It is expected that the work should be focused in a particular area for concept, design, implementation and analysis. Topicsselection covering recent and relevant topics related to the emerging areas. Ideally, recent reputed journal papers abstraction and implementation shall be encouraged. At the end of the semester, a student has to submit a detailed report incorporating literature survey, problem formulation, clear problem statement, research methods, result analysis,conclusion, etc.

**COURSE PREREQUISITE:** Datamining.

**COURSE OBJECTIVE:** To be able to formulate machine learning problems corresponding to different applications.

**COURSE OUTCOMES:** After completing this course, students should be able to:

CO#	Course Outcomes	Highest Level of Cognitive Domain
CO1	Understand different types of machine learning techniques and Apply various mathematical models for supervised machine learning models.	L2
CO2	Recognize the characteristics of machine learning, binary classification and Bayesian learning	L2
CO3	Apply and evaluate the unsupervised machine learning models through various clustering algorithms.	L3
CO4	Solve classification problems using concept learning and decision trees	L3
CO5	Analyze Multilayer Perceptron and Neural network algorithms	L4

L1 – Remember, L2 – Understand, L3 – Apply, L4 – Analyze, L5 – Evaluate, L6 - Create

**Course Content / Syllabus:**

UNIT No.	Content	Hours
<b>1</b>	<b>Introduction:</b> What Is Machine Learning, Examples of Machine Learning Applications, History of Machine Learning, Related Topics. <b>Supervised Learning:</b> Learning a Class from Examples, Vapnik-Chervonenkis Dimension, Probably Approximately Correct Learning, Noise, Learning Multiple Classes, Regression, Model Selection and Generalization, Dimensions of a Supervised Machine Learning Algorithm.	<b>12</b>
<b>2</b>	<b>Bayesian Decision Theory:</b> Introduction, Classification, Losses and Risks, Discriminant Functions, Association Rules. <b>Parametric Methods:</b> Introduction, Maximum Likelihood Estimation, Evaluating an Estimator: Bias and Variance, The Bayes' Estimator, Parametric Classification, Regression, Tuning Model Complexity Bias/Variance Dilemma, Model Selection Procedures.	<b>12</b>

<b>3</b>	<p><b>Clustering:</b> Introduction, Mixture Densities, k-Means Clustering, Expectation-Maximization Algorithm, Mixtures of Latent Variable Models, Supervised Learning after Clustering, Spectral Clustering, Hierarchical Clustering, Choosing the Number of Clusters.</p> <p><b>Nonparametric Methods:</b> Nonparametric Density Estimation, Generalization to Multivariate Data, Nonparametric Classification, Condensed Nearest Neighbor, Distance-Based Classification, Outlier Detection, Nonparametric Regression Smoothing Models.</p>	<b>12</b>
<b>4</b>	<p><b>Decision Trees:</b> Introduction, Univariate Trees, Pruning, Rule Extraction from Trees, Learning Rules from Data, Multivariate Trees.</p> <p><b>Linear Discrimination:</b> Introduction, Generalizing the Linear Model, Pairwise Separation, Parametric Discrimination Revisited, Gradient Descent, Logistic Discrimination, Learning to Rank.</p>	<b>12</b>
<b>5</b>	<p><b>Multilayer Perceptron:</b> Introduction, The Perceptron, Training a Perceptron, Learning Boolean Functions, Multilayer Perceptrons, MLP as a Universal Approximator, Backpropagation Algorithm, The Perceptron, Training a Perceptron, Learning Boolean Functions, Multilayer Perceptrons, MLP as a Universal Approximator, Backpropagation Algorithm.</p>	<b>12</b>

**COURSE PREREQUISITE:** Statistics, Calculus and Linear Algebra.

**COURSE OBJECTIVES:** To be able to find solutions to different Engineering problems using Image Processing algorithms.

**COURSE OUTCOMES:** After completing this course, students should be able to:

<b>CO#</b>	<b>Course Outcomes</b>	<b>Highest Level of Cognitive Domain</b>
<b>CO1</b>	Explain the basic concepts in image processing.	L2
<b>CO2</b>	Develop image enhancement methods based on intensity transformation and spatial filtering.	L3
<b>CO3</b>	Model and apply different segmentation and edge detection techniques	L3
<b>CO4</b>	Develop algorithms for feature extraction to detect objects in image.	L3
<b>CO5</b>	Apply the image processing concepts to analyze colour images	L3

L1 – Remember, L2 – Understand, L3 – Apply, L4 – Analyze, L5 – Evaluate, L6 - Create

**Course Content / Syllabus:**

<b>UNIT No.</b>	<b>Content</b>	<b>Hours</b>
UNIT 1	<b>Introduction:</b> Image processing systems and its applications. Basic image file formats. Image formation: Geometric and photometric models; Digitization - sampling, quantization; Image definition and its representation, neighborhood metrics.	<b>12</b>
UNIT 2	<b>Intensity transformations and spatial filtering:</b> Enhancement, contrast stretching, histogram specification, local contrast enhancement; Smoothing, linear and order statistic filtering, sharpening, spatial convolution, Gaussian smoothing, DoG, LoG.	<b>12</b>

UNIT 3	<b>Segmentation:</b> Pixel classification; Grey level thresholding, global/local thresholding; Optimum thresholding - Bayes analysis, Otsu method; Derivative based edge detection operators, edge detection/linking, Canny edge detector; Region growing, split/merge techniques, line detection, Hough transform.	<b>12</b>
UNIT 4	<b>Image/Object features extraction:</b> Textural features - gray level co-occurrence matrix; Moments; Connected component analysis; Convex hull; Distance transform, medial axis transform, skeletonization/thinning, shape properties. <b>Registration:</b> Mono-modal/multimodal image registration; Global/local registration; Transform and similarity measures for registration; Intensity/pixel interpolation.	<b>12</b>
UNIT 5	<b>Colour image processing:</b> Fundamentals of different colour models - RGB, CMY, HSI, YCbCr, Lab; False Colour; Pseudo Colour; Enhancement; Segmentation. <b>Morphological Filtering Basics:</b> Dilation and Erosion Operators, Top Hat Filters	<b>12</b>

**COURSE PREREQUISITE:** Datamining, System Software

**COURSE OBJECTIVES:** To learn the basic concepts in building NLP applications using linguistic knowledge and machinelearning approaches.

**COURSE OUTCOMES:** After completing this course, students should be able to:

<b>CO#</b>	<b>Course Outcomes</b>	<b>Highest Level of Cognitive Domain</b>
<b>CO1</b>	Finite state transducers for Language Processing.	L3
<b>CO2</b>	Illustrate the various aspects of natural language processing using phonetics.	L2
<b>CO3</b>	Develop of Parts of Speech taggers using linguistic knowledge.	L3
<b>CO4</b>	Design of natural language processing tools using machine learning algorithms.	L3
<b>CO5</b>	Illustrate the various aspects of discourse analysis, dialogues and natural language generation.	L3

L1 – Remember, L2 – Understand, L3 – Apply, L4 – Analyze, L5 – Evaluate, L6 - Create

**Course Content / Syllabus:**

<b>UNIT No.</b>	<b>Content</b>	<b>Hours</b>
<b>1</b>	<b>Introduction</b> Introduction to NLP: Definition, Knowledge in speech and speech language processing, Word Classes: Review of Regular Expressions, Morphology: Inflectional, derivational, parsing and parsing with FST, Combining FST lexicon and rules, human morphological processing.	<b>12</b>
<b>2</b>	<b>Phonology</b> Speech sounds, phonetic transcription, phoneme and phonological rules, optimality theory, machine learning of phonological rules, phonological aspects of prosody and speech synthesis. Pronunciation, Spelling and N-grams: Spelling errors, detection and elimination using probabilistic models, pronunciation variation (lexical, allophonic, dialect), decision tree model, counting words in Corpora, simple N-grams, smoothing (Add One, Written-Bell, Good-Turing), N-grams for spelling and pronunciation.	<b>12</b>

<b>3</b>	<b>POS Tagging</b> Tag sets, concept of HMM tagger, rule based and stochastic POST, algorithm for HMM tagging, transformation-based tagging, Sentence level construction & unification: Noun phrase, co-ordination, sub-categorization, concept of feature structure and unification.	<b>12</b>
<b>4</b>	<b>Lexical Semantics and Word Sense Disambiguation:</b> Semantics: Representing Meaning: Unambiguous representation, canonical form, expressiveness, meaning structure of language, basics of FOPC, semantics of FIPC. Semantic Analysis: Syntax driven, attachment & integration, robustness. Lexemes (homonymy, polysemy, synonymy, hyponymy), WordNet, internal structure of words, creativity and the lexicon: metaphor and metonymy and their computational approaches. Word Sense Disambiguation: Selection restriction-based, machine learning based and dictionary based approaches.	<b>12</b>
<b>5</b>	<b>Pragmatics</b> Discourse: Reference resolution and phenomena, syntactic and semantic constraints on Co reference, pronoun resolution algorithm, text coherence, discourse structure. Dialogues: Turns and utterances, grounding, dialogue acts and structures. Natural Language Generation: Introduction to language generation, architecture, discourse planning, text schemata, rhetorical relations.	<b>12</b>

**COURSE PREREQUISITE:** DBMS

**COURSE OBJECTIVE:** The main objective of this course is to present the basic concepts in information retrieval and more advanced techniques of multimodal based information systems.

**COURSE OUTCOMES (COs)**

<b>CO#</b>	<b>Course Outcomes</b>	<b>Highest Level of Cognitive Domain</b>
<b>CO1</b>	Describe set theoretic and algebraic Information Retrieval models	L2
<b>CO2</b>	Describe Information Retrieval Boolean Model to retrieve relevant documents	L2
<b>CO3</b>	Describe inverted index implementation on parallel and distributed architecture	L2
<b>CO4</b>	Analyze Vector Space Model using different representations to evaluate the results	L4
<b>CO5</b>	Analyze the results of Retrieval models using various techniques	L4

**L1 – Remember, L2 – Understand, L3 – Apply, L4 – Analyze, L5 – Evaluate, L6 - Create**

## Course Content / Syllabus:

UNIT No.	Content	Hours
1	<b>Introduction:</b> Motivation, Basic concepts, Past, present, and future, The retrieval process. <b>Modeling:</b> Introduction, A taxonomy of information retrieval models, Retrieval: Adhoc and filtering, A formal characterization of IR models, Classic information retrieval, Alternative set theoretic models, Alternative algebraic models, Alternative probabilistic models, Structured text retrieval models, Models for browsing.	12
2	<b>IR Using Boolean Model:</b> Information retrieval using the Boolean model, An example information retrieval problem, A first take at building an inverted index, Processing Boolean queries, The dictionary and postings lists, Determining dictionary terms, Postings lists, revisited, Tolerant retrieval, Wildcard queries, Spelling correction, Phonetic correction.	12
3	<b>Indexing</b> Introduction; Inverted Files; Other indices for text; Boolean queries; Sequential searching; Pattern matching; Structural queries; Compression. Index construction, Construction of large indexes, Distributed indexing, Dynamic indexing, Other types of indexes Parallel and Distributed IR: Introduction, Parallel IR, Distributed IR.	12
4	<b>Vector space retrieval</b> Scoring and term weighting, Parametric and zone indexes, Weighted zone scoring, Term frequency and weighting, Inverse document frequency, tf-idf weighting, Variants in weighting functions, Documents as vectors, Inner products, Queries as vectors, Heuristics for efficient scoring and ranking, Inexact top K document retrieval, Interaction between vector space and other retrieval methods, Query parsing and composite scoring, Text Operations: Introduction, Document preprocessing, Document classification and clustering.	12
5	<b>Retrieval Evaluation</b> Introduction, Retrieval performance evaluation, Reference collections. Query Languages: Introduction, keyword-based querying, Pattern matching, Structural queries, Query protocols. Query Operations: Introduction, User relevance feedback, Automatic local analysis, Automatic global analysis. Searching the Web: Introduction, Challenges, Characterizing the web, Search engines	12

**COURSE PREREQUISITE:** Database Management Systems.

**COURSE OBJECTIVES:** The main objectives of this subject are to introduce basic concepts related to Big Data which includes the Big Data Ecosystem and technologies and to apply machine learning algorithms to complex data.

**COURSE OUTCOMES:** After completing this course, students should be able to:

CO#	Course Outcomes	Highest Level of Cognitive Domain
CO1	Explain fundamentals of big data analytics and its applications	L2
CO2	Apply big data technologies and tools to analyze the data	L3
CO3	Apply data mining methods to solve complex big data problems.	L3
CO4	Identify frequent items in big data problems	L3
CO5	Explain recommendation system and its applications	L2

L1 – Remember, L2 – Understand, L3 – Apply, L4 – Analyze, L5 – Evaluate, L6 – Create

**Course Content / Syllabus:**

UNIT No.	Content	Hours
<b>1</b>	<b>Introduction</b> Overview of Big Data, History, Structuring Big Data, Types of Data, Elements of Big Data, Data analytics project life cycle, Problems & challenges in understanding Data Analytics, Web page categorization, computing the frequency of stock market change. Use of Big Data in Social Networking, Use of Big Data in preventing Fraudulent activities, Use of Big Data in Retail Industry.	<b>12</b>

<b>2</b>	<b>Big Data Technology</b> Exploring Big Data Stack, Virtualization, Virtualization Approaches, Distributed and parallel computing for Big Data, The cloud and Big Data, Cloud Deployment Models, Cloud Delivery Models, Cloud providers in Big Data Market. Introducing Hadoop, Hadoop Ecosystem, Hadoop Distributed File Systems(HDFS), Features of HDFS : Hadoop YARN, MAP Reduce, Features of Map Reduce, Working of Map Reduce, Techniques to Optimize Map Reduce Jobs, Uses of Map Reduce, HBase, Features of HBase, Role of HBase in Big Data processing, Other tools of Hadoop (Hive, Pig and Pig Latin, Sqoop, ZooKeeper, Flume, Oozie),	<b>12</b>
<b>3</b>	<b>Mining Data Streams</b> The Stream Data Model, A Data-Stream-Management System, Examples of Stream Sources, Stream Queries, Issues in Stream Processing, Sampling Data in a Stream, Filtering Streams, Estimating Moments, Dealing With Infinite Streams, Counting Ones in a Window.	<b>12</b>
<b>4</b>	<b>Frequent Itemset</b> The Market Basket Analysis, A Priori Algorithm, Handling Larger Datasets in Main Memory, Limited-Pass Algorithms, Counting Frequent Items in a Stream.	<b>12</b>
<b>5</b>	<b>Recommendation Systems</b> A Model, Content Based Recommendations, Collaborative Filtering, Dimensionality Reduction Problem, The NetFlix Problem.	<b>12</b>

**COURSE PREREQUISITE:** Mathematics.

**COURSE OBJECTIVES:** To define the type and size of data to be collected. To organize and summarize the data. To analyze the data and draw inferences using different statistical methods.

**COURSE OUTCOMES:** After completing this course, students should be able to:

CO#	Course Outcomes	Highest Level of Cognitive Domain
CO1	Explain the different statistical measures and analysis types available.	L2
CO2	Apply correlation to identify relationships between variables and regression analysis to predict outcomes	L4
CO3	Forecast the trend pattern exhibited by the given data using Time series Analysis	L4
CO4	Carry out one way and two way Analysis of Variance	L4
CO5	Calculate and Interpret statistical quality control using Charts	L4

L1 – Remember, L2 – Understand, L3 – Apply, L4 – Analyze, L5 – Evaluate, L6 - Create

**Course Content / Syllabus:**

UNIT No.	Content	Hours
<b>1</b>	<b>Introduction to Statistics :</b> Introduction to uni-variate data, Measures of central tendency, Arithmetic mean, Median, Mode, Geometric Mean and Harmonic Mean, Measures of dispersion, Range, Quartile deviation, Mean deviation, Standard deviation and Co-efficient of variation, Skewness, Kurtosis and Moments, Problems.	<b>12</b>
<b>2</b>	<b>Correlation and regression analysis:</b> Introduction to Correlation analysis, Types of correlation, Methods of studying correlation – Karl. Pearson’s coefficient of correlation Rank correlation method, Partial and Multiple Correlation, Introduction to Regression analysis – Regression lines, Properties of Regression coefficients, Angle between two regression lines, Problems.	<b>12</b>

<b>3</b>	<b>Analysis of Time Series:</b> Components of time series – Problems of classifications – Methods of measuring trends, Freehand graphing method, semi average method, moving average method, method of least squares, Introduction to Measurement of seasonal variation, Method of simple averages (weekly, monthly and quarterly), Ratio to trend method, Problems.	<b>12</b>
<b>4</b>	<b>Analysis of variance:</b> Introduction to Small sample tests based on t and F distribution, Test for single mean, difference between means, Paired t-test, Test for equality of variances, ANOVA- one - way classification, Two-way classification., Non-Parametric Test: The Mann Whitney test, The Kruskal-Wallis single-factor analysis of variance by ranks, Procedure, Problems.	<b>12</b>
<b>5</b>	<b>Statistical Quality Control:</b> Introduction - Process control, control charts for variables - Mean and Range chart (X Bar and R), control charts for variables - Mean and Standard deviation chart (X Bar and s), Introduction to Attributes Control charts, Control chart for the number of defectives (np-chart), Control chart for the fraction of defectives (p-chart), Control chart for the number of defects (c-chart).	<b>12</b>

# **PROFESSIONAL ELECTIVE – III**

<b>DEPARTMENT</b>	<b>INFORMATION SCIENCE &amp; ENGINEERING</b>						
<b>Course Code</b>	<b>23MSDS311</b>	<b>Total Credits</b>	<b>4</b>	<b>Course Type</b>	<b>Professional Elective Course - III</b>		
<b>Course Title</b>	<b>Deep Learning</b>						
<b>Teaching Learning Process</b>		<b>Contact Hours</b>	<b>Credits</b>	<b>Assessment in Weightage and marks</b>			
	<b>Lecture</b>	<b>4</b>			<b>CIE</b>	<b>SEE</b>	<b>Total</b>
	<b>Tutorial</b>	<b>-</b>		<b>Weightage</b>	<b>40 %</b>	<b>60 %</b>	<b>100 %</b>
	<b>Practical</b>	<b>-</b>		<b>Maximum Marks</b>	<b>40 Marks</b>	<b>60 Marks</b>	<b>100 Marks</b>
	<b>Total</b>	<b>4</b>	<b>4</b>	<b>Minimum Marks</b>	<b>20 marks</b>	<b>25 marks</b>	<b>45 Marks</b>

**COURSE PREREQUISITE:** Machine Learning, Linear Algebra

**COURSE OBJECTIVES:** To understand the theoretical basis underlying neural networks and deep learning. To implement deep learning components on real-world data sets.

**COURSE OUTCOMES:** After completing this course, students should be able to:

<b>CO#</b>	<b>Course Outcomes</b>	<b>Highest Level of Cognitive Domain</b>
<b>CO1</b>	Differentiate between machine learning and deep learning.	L2
<b>CO2</b>	Focus on artificial neural network and their uses in deep learning.	L2
<b>CO3</b>	Analyze different deep learning models and parameters.	L4
<b>CO4</b>	Train a deep learning model.	L3
<b>CO5</b>	Implement a deep learning application to solve real-world problem.	L4

L1 – Remember, L2 – Understand, L3 – Apply, L4 – Analyze, L5 – Evaluate, L6 - Create

**Course Content / Syllabus:**

<b>UNIT No.</b>	<b>Content</b>	<b>Hours</b>
1	Introduction to Machine learning, Supervised and Unsupervised ML, Reinforcement learning , Linear regression ,Cost functions ,Overfitting Under-fitting, Hyper-parameter, Deep Learning vs Traditional Machine Learning.	<b>12</b>
2	Artificial Neural Network Feed-forward neural network, Back propagation, optimization problem, Activation & Synaptic Dynamics, stability and convergence.	<b>12</b>
3	Introduction to deep learning, What is Deep Learning Algorithm, What is Deep Learning Algorithm, Convolutional Neural Networks (CNNs), Convolutional Neural Networks (CNNs), Recurrent Neural Networks (RNNs), Generative Adversarial Networks (GANs).	<b>12</b>
4	Radial Basis Function Networks (RBFNs), Self-Organizing Maps (SOMs), Restricted Boltzmann Machines (RBMs), Deep Belief Networks (DBN), Gradient Descent Optimization Technique, Dropout, Transfer learning.	<b>12</b>
5	Deep learning library, Keras backend, Tensorflow, Theano, Keras models and layers, Keras modelclass, Case studies on vision based object detection and human action detection using deep learning models.	<b>12</b>

**COURSE PREREQUISITE:**

**COURSE OBJECTIVES:** Provide to students the feel of the actual working environment and to gain practical knowledge and skills, which in turn will motivate, develop and build their confidence.

**COURSE OUTCOMES (COs)**

<b>CO#</b>	<b>Course Outcomes</b>	<b>Highest Level of Cognitive Domain</b>
<b>CO1</b>	Describe use of advanced tools and techniques encountered during industrial training and visit.	L2
<b>CO2</b>	Develop awareness about general workplace behavior and build interpersonal and team skills.	L3
<b>CO3</b>	Develop solutions and prepare professional work reports and presentations	L4

**L1 – Remember, L2 – Understand, L3 – Apply, L4 – Analyze, L5 – Evaluate, L6 - Create**

This course is designed to help the student obtain skills to use of advanced tools and techniques used in the industry during industrial training and visit. And also students get an opportunity to interact with industrial personnel and follow engineering practices and discipline prescribed in industry. It is also designed to develop awareness about general workplace behavior and build interpersonal and team skills

<b>DEPARTMENT</b>	<b>INFORMATION SCIENCE &amp; ENGINEERING</b>						
<b>Course Code</b>	<b>23MSDS330P</b>	<b>Total Credits</b>	<b>6</b>	<b>Course Type</b>	<b>Project Work Course</b>		
<b>Course Title</b>	<b>PROJECT WORK PHASE-I</b>						
<b>Teaching Learning Process</b>		<b>Contact Hours</b>	<b>Credits</b>	<b>Assessment in Weightage and marks</b>

	<b>Total</b>	<b>12</b>	<b>6</b>	<b>Minimum Marks</b>	<b>50 Marks</b>	<b>---</b>	<b>50 Marks</b>

**COURSE PREREQUISITE:** Regular Subjects Mentioned In the Scheme

**COURSE OBJECTIVES:** To understand formation of the problem as part of software life cycle

**COURSE OUTCOMES (COs)**

<b>CO#</b>	<b>Course Outcomes</b>	<b>Highest Level of Cognitive Domain</b>
<b>CO1</b>	Conduct literature review in the area relevant to the computer science.	L2
<b>CO2</b>	Formulate a problem.	L3
<b>CO3</b>	Prepare a consolidated report of the literature survey and problem formulation.	L4

**L1 – Remember, L2 – Understand, L3 – Apply, L4 – Analyze, L5 – Evaluate, L6 – Create**

The students are required to take up an in-house or industrial project work relevant to the course. In this course preliminary work involving literature review and problem formulation will be taken up. The candidate conducts the project under the supervision of project guide.

# **SEMESTER – IV**

# **PROFESSIONAL ELECTIVE – IV**

**COURSE PREREQUISITE:** Advanced Algorithms.

**COURSE OBJECTIVE:** This course introduces the concepts of representing Social Network and Information Network and analysis of Information flow in Social and Information Network.

**COURSE OUTCOMES (COs)**

<b>CO#</b>	<b>Course Outcomes</b>	<b>Highest Level of Cognitive Domain</b>
<b>CO1</b>	Illustrate Social Network as a connected graph.	L2
<b>CO2</b>	Demonstrate the social network as a small world	L3
<b>CO3</b>	Apply methods to evaluate the behavior of cascading networks and the diffusion over social and information networks.	L3
<b>CO4</b>	Develop graph models to describe the structure of the web and Information Network.	L3
<b>CO5</b>	Apply page rank algorithm to web pages in the Information Network	L3

**L1 – Remember, L2 – Understand, L3 – Apply, L4 – Analyze, L5 – Evaluate, L6 - Create**

Course Content / Syllabus:

UNIT No.	Content	Hours
1	<p><b>Introduction:</b>Aspects of Networks, Central Themes and Topics. Graphs: BasicDefinitions, Paths and Connectivity, Distance and Breadth-First Search, Network Datasets: An Overview</p>	12
2	<p><b>The Small-World Phenomenon</b> Six Degrees of Separation, Structure and Randomness, Decentralized Search, Empirical Analysis and Generalized Models, Core-Periphery Structures and Difficulties in Decentralized Search, Advanced Material: Analysis of Decentralized Search. <b>Positive and Negative Relationships:</b> Structural Balance , Characterizing the Structure of Balanced Networks, Applications of Structural Balance , A Weaker Form of Structural Balance , Advanced Material: Generalizing the Definition of Structural Balance.</p>	12
3	<p><b>Cascading Behaviour in Networks</b> Diffusion in Networks, Modeling Diffusion through a Network, Cascades and Clusters, Diffusion, Thresholds, and the Role of Weak Ties, Extensions of the Basic Cascade Model, Knowledge, Thresholds, and Collective Action, Advanced Material: The Cascade Capacity. <b>Epidemics :</b> Diseases and the Networks that Transmit Them , Branching Processes, The SIR Epidemic Model , The SIS Epidemic Model , Synchronization , Transient Contacts and the Dangers of Concurrency , Genealogy, Genetic Inheritance, and Mitochondrial Eve, Advanced Material: Analysis of Branching and Coalescent Processes</p>	12
4	<p><b>Power Laws and Rich-Get-Richer Phenomena</b> Popularity as a Network Phenomenon, Power Laws, Rich-Get-Richer Models, The Unpredictability of Rich-Get-Richer Effects, The Long Tail, The Effect of Search Tools and Recommendation Systems Advanced Material: Analysis of Rich-Get-Richer Processes. <b>The structure of the Web :</b> The World Wide Web, Information Networks, Hypertext, and Associative Memory The Web as a Directed Graph, The Bow-Tie Structure of the Web, The Emergence of Web 2.0</p>	12
5	<p><b>Link Analysis and Web Search</b> <b>Searching the Web:</b> The Problem of Ranking , Link Analysis using Hubs and Authorities, PageRank, Applying Link Analysis in Modern Web Search, Applications beyond the Web, Advanced Material: Spectral Analysis, Random Walks, and Web Search <b>Strong and Weak Ties:</b> Triadic Closure , The Strength of Weak Ties, Tie Strength and Network Structure in Large-Scale Data , Tie Strength, Social Media, and Passive Engagement Closure, Structural Holes, and Social Capital, Advanced Material: Betweenness Measures and Graph Partitioning</p>	12

<b>CO2</b>	Conduct experiments/Design and Analysis/solution iterations and document the results.	L3
<b>CO3</b>	Prepare a technical report and presentations.	L4

**L1 – Remember, L2 – Understand, L3 – Apply, L4 – Analyze, L5 – Evaluate, L6 - Create**

The students are required to take up a project work relevant to the course, which involves literature review, problem formulation, experimentation, analysis of results and discussion. The entire project will be executed under the supervision of project guide.

**Guidelines:**

1. Student shall be associated with a faculty member serving as internal guide to supervise the project.
2. If the student is conducting the project work in an industry or an organization an external guide is to be chosen from industry or organization (along with internal guide) with the approval of the Head of the Department
3. The student will work with the project guide /supervisor towards the identification of the problem through a systematic literature review and finalize the objectives and scope of work.
4. Student is expected to come out with detail specifications, methodology, resources required, critical issues and any other issues related to design and implementation of the project should be provided in consultation with Guide.
5. The student should submit the proposal within ten working days from the commencement of the semester to the Head of Department after due approval from the guide.
6. The student is expected to exert on design, development and testing of the proposed work as per the schedule.
7. The student should present an interim progress review as per the department calendar of events.
8. Completed project work phase -1/ project work phase -2 documentation should be in the form of a report and the report should be submitted to the department at the end of the semester.
9. The report should include: Abstract, Content sheets, Introduction chapter with objectives, literature review chapter, materials and methodology chapter, results and discussion chapter, summary and conclusion followed by reference list and appendix if any.
10. The student should make a final presentation at the end of the semester as per the department Calendar of events.

# **OPEN ELECTIVE COURSE**

<b>DEPARTMENT</b>	<b>INFORMATION SCIENCE &amp; ENGINEERING</b>						
<b>Course Code</b>	<b>23MSDS251E</b>	<b>Total Credits</b>	<b>4</b>	<b>Course Type</b>	<b>Open Elective Course</b>		
<b>Course Title</b>	<b>INTRODUCTION TO DATA STRUCTURES AND ALGORITHMS</b>						
<b>Teaching Learning Process</b>		<b>Contact Hours</b>	<b>Credits</b>	<b>Assessment in Weightage and marks</b>			
	<b>Lecture</b>	<b>4</b>			<b>CIE</b>	<b>SEE</b>	<b>Total</b>
	<b>Tutorial</b>	<b>-</b>		<b>Weightage</b>	<b>40 %</b>	<b>60 %</b>	<b>100 %</b>
	<b>Practical</b>	<b>-</b>		<b>Maximum Marks</b>	<b>40 Marks</b>	<b>60 Marks</b>	<b>100 Marks</b>
	<b>Total</b>	<b>4</b>	<b>4</b>	<b>Minimum Marks</b>	<b>20 marks</b>	<b>25 marks</b>	<b>45 Marks</b>

**COURSE PREREQUISITE:** Fundamentals of Computer Science

**COURSE OBJECTIVES:** To understand the fundamental concepts and basic principles of Data Structures & Algorithms.

**COURSE OUTCOMES (COs)**

<b>CO#</b>	<b>Course Outcomes</b>	<b>Highest Level of Cognitive Domain</b>
<b>CO1</b>	Explain asymptotic notations and analyze the performance of algorithms.	L2
<b>CO2</b>	Explain the working principle of linear data structure stack, queue, linked list and implement with their real time applications	L3
<b>CO3</b>	Explain the working principle of non-linear data structure trees and graphs and implement with their real time applications	L3
<b>CO4</b>	Apply concepts of linear and nonlinear data structures to solve problems.	L3
<b>CO5</b>	Apply file structures and hashing techniques for efficient searching.	L2

L1 – Remember, L2 – Understand, L3 – Apply, L4 – Analyze, L5 – Evaluate, L6 - Create

**Course Content / Syllabus:**

<b>UNIT No.</b>	<b>Content</b>	<b>Hours</b>
<b>1</b>	<b>Basic Terminologies &amp; Introduction to Algorithm and Data Organization:</b> Algorithm specification, Recursion, Performance analysis, Asymptotic Notation - The Big-O, Omega and Theta notation.	<b>12</b>
<b>2</b>	<b>Linear Data Structure:</b> Array, Stack, Queue, Linked-list and its types, Various Representations, Operations & Applications of Linear Data Structures.	<b>12</b>

<b>3</b>	<b>Non-linear Data Structure:</b> Trees (Binary Tree, Threaded Binary Tree, Binary Search Tree, AVL Tree) and Graphs (Directed, Undirected), Various Representations, Operations (search and traversal algorithms) & Applications of Non-Linear Data Structures.	<b>12</b>
<b>4</b>	<b>Searching and Sorting on Various Data Structure:</b> Sequential Search, Binary Search, Breadth First Search, Depth First Search, Insertion Sort, Selection Sort, Merge Sort, Quick Sort, Heap Sort.	<b>12</b>
<b>5</b>	<b>File Organization:</b> Sequential, Direct, Indexed Sequential, Hashing and various types of accessing schemes.	<b>12</b>

**Text Books:**

1. Fundamentals of Data Structures, E. Horowitz and S. Sahni, 2<sup>nd</sup> edition, Universities Press, 2008.
2. Data Structures and Algorithms, Alfred V. Aho, John E. Hopcroft, Jeffrey D. Ullman. Edition 1, Pearson, 1982

	<b>Total</b>	<b>4</b>	<b>4</b>	<b>Minimum Marks</b>	<b>20 marks</b>	<b>25 marks</b>	<b>45 Marks</b>

**COURSE PREREQUISITE:** Introduction to Discrete Mathematical Structures.

**COURSE OBJECTIVES:** To introduce Database Management Systems and emphasis on how to organize, maintain and retrieve information from a Database.

**COURSE OUTCOMES (COs)**

<b>CO#</b>	<b>Course Outcomes</b>	<b>Highest Level of Cognitive Domain</b>
<b>CO1</b>	Describe different data models in database management systems	L2
<b>CO2</b>	Demonstrate to create a database and formulation of queries using Structured Query Language (SQL)	L3
<b>CO3</b>	Illustrate query optimization and indexing in relational database.	L3
<b>CO4</b>	Discuss the concepts of transactions and concurrency control.	L2
<b>CO5</b>	Explain advanced database systems and database security.	L2

**L1 – Remember, L2 – Understand, L3 – Apply, L4 – Analyze, L5 – Evaluate, L6 - Create**

## Course Content / Syllabus:

UNIT No.	Content	Hours
1	<b>Introduction:</b> Introduction to Database. Hierarchical, Network and Relational Models. <b>Database system architecture:</b> Data Abstraction, Data Independence, Data Definition Language (DDL), Data Manipulation Language (DML). <b>Data models:</b> Entity-relationship model, network model, relational and object-oriented data models, integrity constraints, data manipulation operations.	12
2	<b>Relational query languages:</b> Relational algebra, Tuple and domain relational calculus, SQL3, DDL and DML constructs, Open source and Commercial DBMS - MYSQL, ORACLE, DB2, SQL server. <b>Relational database design:</b> Domain and data dependency, Armstrong's axioms, Functional Dependencies, Normal forms, Dependency preservation, Lossless design.	12
3	<b>Query processing and optimization:</b> Evaluation of relational algebra expressions, Query equivalence, Join strategies, Query optimization algorithms. <b>Storage strategies:</b> Indices, B-trees, Hashing.	12
4	<b>Transaction processing:</b> Concurrency control, ACID property, Serializability of scheduling, Locking and timestamp-based schedulers, Multi-version and optimistic Concurrency Control schemes, Database recovery.	12
5	<b>Database Security:</b> Authentication, Authorization and access control, DAC, MAC and RBAC models, Intrusion detection, SQL injection. <b>Advanced topics:</b> Object oriented and object relational databases, Logical databases, Web databases, Distributed databases, Data warehousing and data mining.	12

### Text Books:

1. Database System Concepts. Abraham Silberschatz, Henry F. Korth and S. Sudarshan, 7<sup>th</sup> edition 2021.

### Reference Books:

1. Principles of Database and Knowledge – Base Systems, Vol 1 by J. D. Ullman, Computer Science Press 1988.
2. Fundamentals of Database Systems. R. Elmasri and S. Navathe, 7<sup>th</sup> edition Pearson 2008
3. Foundations of Databases. Serge Abiteboul, Richard Hull, Victor Vianu.

**COURSE PREREQUISITE:** Mathematics, Data Structures, Linear Algebra

**COURSE OBJECTIVES:** To be able to formulate machine learning problems corresponding to different applications.

#### **COURSE OUTCOMES(COs)**

<b>CO#</b>	<b>Course Outcomes</b>	<b>Highest Level of Cognitive Domain</b>
<b>CO1</b>	Explain the basic principles of Learning theories	<b>L2</b>
<b>CO2</b>	Explain the principles of dimensionality reduction and feature selection techniques	<b>L2</b>
<b>CO3</b>	Develop a wide variety of supervised learning algorithms	<b>L3</b>
<b>CO4</b>	Analyze various clustering algorithms	<b>L4</b>
<b>CO5</b>	Apply machine learning algorithms to Software Engineering	<b>L3</b>

**L1 – Remember, L2 – Understand, L3 – Apply, L4 – Analyze, L5 – Evaluate, L6 - Create**

#### **Course Content / Syllabus:**

<b>UNIT No.</b>	<b>Content</b>	<b>Hours</b>
<b>1</b>	<b>Introduction &amp; Bayesian Decision Theory</b> What Is Machine Learning?, Challenges, Examples of Machine Learning Applications, Present Research Avenues, Introduction to Bayesian Decision Theory, Classification, Losses and Risks, Discriminant Functions, Utility Theory, Association Rules	<b>12</b>
<b>2</b>	<b>Dimensionality Reduction</b> Introduction, Feature Generation, Feature Selection, Principal Component Analysis, Factor Analysis, Multidimensional Scaling, Linear Discriminant Analysis, Locality Preserving Projections (LPP) and its variants, Locality Preserving Indexing and its variants.	<b>12</b>

<b>3</b>	<b>Supervised Learning</b> Learning a Class from Examples, Probably Approximately Correct (PAC) Learning, Noise, Learning Multiple Classes, Regression, Model Selection and Generalization, Dimensions of a Supervised Machine Learning Algorithms, Decision Tree Induction, Nearest Neighbors, Bayesian Classifier, Artificial Neural Networks, Model Over fitting, Performance Evaluation of classifiers.	<b>12</b>
<b>4</b>	<b>Clustering</b> Basic Concepts, Proximity Measures, Sequential Algorithms, Hierarchical Algorithms, Schemes based on Functional Optimization, Clustering Algorithms based on Graph Theory, Cluster Validity.	<b>12</b>
<b>5</b>	<b>Machine Learning Applications in Software Engineering</b> The challenges, Related Issues, Learning Approaches, SE tasks for ML Applications, State of the Practice in ML & SE, Present Status, Applying ML algorithms to SE Tasks.	<b>12</b>
